

WHAT IS ECOCHEM?

EcoChem is a technology based company that provides growers with a source of concentrated natural organic fertilizer, seed treatment and soil amendments that help transform agriculture into an environmentally sound sustainable enterprise. Our [Natural Organic Products](#) are field proven to maximize yield and quality in both protected and open field crop environments.

The materials used in our production process are derived from naturally occurring and sustainable sources. Our products are highly efficient, have no adverse affect on the environment, are not harmful to animals, plants and humans and can be manufactured, transported, applied and disposed of safely. Where possible, we use recyclable packaging materials.

The company has a global reach and offers innovative solutions that can meet the specific needs of almost any application. We are dedicated to maintaining our reputation for superior products and services and providing our clients with solutions that improve their productivity - one project at a time.

EcoChem provides environmentally safe products, derived from naturally occurring and sustainable sources, produced in accordance with National Organic Standards Board (NOSB) guidelines and complying with the EPA Toxic Substance Control Act (TSCA) and the rules. Products are consistent with organic principles and the National List of Allowed Substances.

Corporate Overview

THE COMPANY

EcoChem is an Alberta Corporation engaged in innovation, product development and manufacturing. Established in 1998, the company offers products and services that contribute to the movement toward self-regulation and voluntary compliance in matters associated with sustainable agriculture, waste management and the environment. With innovations based on science, EcoChem is helping to put the principles of sustainability into practice.

PRODUCTS

EcoChem products are produced using constituents derived from naturally occurring and sustainable sources. Our products are safe to handle, transport, use and dispose of. We are committed to conserving natural resources and minimizing the environmental impact of our activities. Accordingly, our production process does not utilize thermal energy, does not produce a waste stream and wherever possible we use recyclable packaging materials. EcoChem is proud to be a leading supplier of technically advanced, environmentally friendly products to the global market.

CUSTOMER SERVICE

EcoChem is committed to providing quality customer service that is responsive, efficient and value for money. Accordingly, we review customer feedback on a continuous basis in an effort to understand and fulfill our customer's needs.

MANAGEMENT TEAM

Placing the right people in the right jobs at the right time is the company's core philosophy. Accordingly, our management team is highly experienced and reflects a diverse background in environmental science, organic waste management, agriculture and other industries. It is our belief that, the skills of our people along with our commitment to continuous product development and integrated services places the company in a position to become valued advisors and providers to its customers.
